

Design your Gutter System

Downspout Size

Choose one size for your whole project:

- **2" x 3"** can drain 30 ft. of gutter
- **3" x 4"** can drain 60 ft. of gutter

Miters (prefabricated corners)

Inside

Outside

Box Miter
You cut the gutter ends straight and place them inside the corner (the easiest to work with)

Strip Miter
You cut the gutter ends at 45° and place them inside the corner (the most finished look)

Bay Window Miter
You cut the gutter ends at 22½° and place them inside the corner (for bay windows/odd angles)

Know your Elbows

- Each downspout requires 3 elbows
- Select "A" and/or "B" type elbows as needed

Flashing

The back of your gutters need to be tucked behind metal trim to prevent leaks.

- Behind an existing drip edge OR
- Order and install gutter flashing

Tuck gutter under existing drip-edge

Add Flashing

OR

Gutter Covers

- Keep gutters clean from the majority of debris
- Easy to install
- Order a solid or screen type cover

Solid Gutter Cover

Screen Gutter Cover

EZ-Smooth Flow
